GERMAN (Deutsch) - CONVERSATIONAL
PERSIAN - CONVERSATIONAL

PROFILE

I am a skilled and experienced Backend/DevOps engineer with over 3.5 years of professional experience. I have a strong grasp of TypeScript, Node.js, and RESTful API design, ensuring the development of scalable and secure backend solutions. My expertise extends to containerization with Docker, automating infrastructure with tools like Terraform, and managing CI/CD pipelines using GitHub Actions and Jenkins. I am proficient in cloud platforms like AWS, where I manage infrastructure, deploy applications, and ensure high availability. Additionally, I am well-versed in monitoring and logging tools such as Prometheus and Grafana. I continuously optimize systems for performance, security, and reliability, while maintaining a keen interest in emerging technologies.

TECHNOLOGIES

Express JS
TypeScript
AWS & Azure
Docker & Kubernetes
CI/CD Automation
Monitoring & Logging

TOP PROJECTS

Scalable API for E-commerce Platform
CI/CD Pipeline for Microservices
Freelancing Platform (with a team)
Multi-Region Deployment Strategy
Database Sharding and Replication
Real Estate Marketplace
